Power BI Financial Performance Dashboard - Q1 2024

This interactive Power BI dashboard analyzes financial performance across multiple departments for Q1 2024. It includes key metrics such as total revenue, total expenses, net profit, and profit margin.

Users can explore data through dynamic slicers by department, month, and expense type (revenue vs. expense), making it easy to isolate performance drivers. The report highlights budget vs. actual variances, monthly trends, and departmental profitability using KPIs, bar charts, and time-series visuals.

Built from a structured dataset using Power Query and DAX, the dashboard demonstrates my ability to turn raw financial data into clear, actionable insights. It reflects skills in data modeling, calculated measures, visual storytelling, and attention to detail-core strengths I am continuing to develop in my path toward a BI/Financial Analyst role.
