AI Financial Dashboard - Power BI

Developed a dynamic Power BI dashboard to analyze revenue, net profit, and profit margins across multiple products over a two-year period. Implemented forecasting, time-series analysis, and an AI Q&A visual to enable natural language queries. Designed a professional, customizable theme balancing bold colors with clean layout to appeal to stakeholders.

Key Features:

- Revenue and Profit KPIs

- Time-series Forecasting

- Interactive AI Q&A

- Product Performance Comparison

- Custom color themes

Skills:

Power BI, DAX, Data Visualization, Forecasting, UI Design
